CA118 Media Air Cleaner

Ceiling mount commercial air cleaner
featuring Hepa-Flow CPZ™ Technology
with three-speed remote switch

The CA118 is a highly effective, cost efficient system for capturing airborne particles and VOCs in your facility

- Specifically designed for commercial drop ceilings with tight clearances, the CA118 media air cleaner fits neatly into any two-by-four foot drop ceiling opening.
- This attractive white grille blends into any décor, making the CA118 especially suitable for areas where cleaner air and aesthetics are important.
- The one-piece grille swings down for easy access to the prefilters, media filters and sorbent media. The grill is removable for ease of cleaning.
- A three-speed forward curve direct-drive maintenance free motor and efficient Coanda airflow, combine to re-circulate filtered air throughout the room.

- Choose 95% at 0.3 efficiency hospital-grade filters, along with CPZ™ sorbent media, to help capture particles and reduce odors, gases and VOCs.

Particles aren't always the problem

Anywhere gases, odors and volatile organic compounds (VOCs) are a part of doing business – you'll want an air cleaner that includes CPZ™ sorbent media. Depending on your particular application, we can adjust the CPZ™ formula to solve your specific need. Honeywell CPZ™ sorbent media is specifically formulated for maximum efficiency at reducing a broad range of gases-odors-VOCs.

CA118 CPZ™
